2 The transfer to another server

The following steps are necessary to create the new course on your server:

[1] Create a new empty course

[2] Restore the backup in this course

3 The Translation to a different language

The translation for the module can be done completely in the course on your Moodle server. Two major steps are necessary:

[1] Go to the content bank and translate the H5P content listed there (and list above 1.Package files)

[2] Open the course for editing. Select "settings" for each item in the course and translate the content.

4. Additional translation steps

[1] Use the Mandala_06.pptx file, open it with PowerPoint. The file includes the English Version of the Self-Evaluation Mandala. Translate the text and save the file. Save the file using “save as” and select PNG. When saving, you get asked to select “this slide only” – select it. Now you have the PNG file of the Mandala in your folder. Replace the English picture with this translated. Finally, check the links in Moodle.

[2] M6-Final_Self-Assessment.elp. Download the eXe-Learning Editor from https://exelearning.net/en/downloads/.
You can use the Install Version but you also can select ”A single Page” in the “Portable Version” and use it. Open the file with the eXeLearning editor and translate the complete content. After the translation, save the file and export it to a “Single Page”. ZIP the complete content in the created folder. Select the Moodle page, upload the ZIP file and extract it. The current content will be replaced by the new language content. Select the index.html file as the main file (if this is not yet selected).
